CV and publications of Dr. Alexey Larionov

PhD Medicine, MSc Bioinformatics, PgCert Academic Practices, Bachelor Medicine

www.larionov.co.uk

2021-Present: Lecturer in Bioinformatics, Cranfield University, UK

Faculty of Engineering and Applied Sciences

My main tasks in this position include research and teaching.

• Research Activities

- Translate recent molecular genetic advances from biomedical research to the environmental and agrifood context. Current research projects where I am a Co-Investigator:
 - Restoring ecosystems after anthropogenic impacts (NERC NE/V006444/1)
 - Developing regenerative technologies in tea breeding and production (BBSRC BB/Y003241/1)
- Manage postdoctoral researchers and supervise PhD projects. Currently supervised PhD projects:
 - Application of long-read sequencing to detection of mycotoxin-producing fungi
 - Application of Self Organizing Maps (SOMs) for dimensionality reduction and classification in SC (single-cell) transcriptomics data analysis
- Write research publications and prepare grant applications: see my publications list, research and PhD projects.

• Teaching activities

- Delivery of lectures and seminars, marking assignments, supervising and marking thesis projects for the Cranfield MSc Applied Bioinformatics course. Modules taught in the last academic year:
 - Introduction to Bioinformatics using Python
 - Introduction to Epigenetics and Metagenomics analysis

• Other Activities

- I co-supervise Medical Genetics MSc projects at Cambridge University, e.g. in this academic year I supervise a project analyzing WGS data in families with heritable predisposition to cancer
- I co-organize Cancer Genomics and Transcriptomics course for EBI (European Bioinformatics Institute, Hinxton), and I deliver transcriptomics data analysis sessions for this course.
- Other standard *ad-hoc* academic tasks, such as reviewing and editing (e.g. I am a member of BJC-Reports editorial board)

Previous employment

2013-2021: Research Associate (Bioinformatics), Cambridge University, UK

Department of Medical Genetics, School of Clinical Medicine

My main task during employment in the Medical Genetics Department at Cambridge University was to provide bioinformatics support to diverse research projects in heritable predisposition to cancer.

- I analyzed data for a wide range of different projects: from small rare-disease family datasets to large cohorts derived from the 100-Thousand Genomes (Genomics England) project.
- I designed and implemented pipelines in different computational environments including HPC clusters and cloud computing (AWS)

- I implemented various types of bioinformatics analysis including secondary bioinformatics (from FASTQ to VCF), variant annotation and prioritization, rare variant association analyses, selection of variants based on functional and biological criteria, etc.
- My teaching tasks included supervising research projects and marking theses for the postgraduate course in Genomic Medicine, taught by the Department of Medical Genetics.
- Along with the tasks carried out for my employment in Cambridge, I published about hormonal and targeted treatments in breast cancer (carrying over from my previous research in Edinburgh) and continued teaching in the Endocrine Physiology and Pharmacology course in Edinburgh University.
- My other academic activities included writing (I have contributed to a number of well-cited papers in reputable journals, see publications 2013-2021), reviewing, editing, and completed multiple courses in different aspects of bioinformatics during this employment.

2008-2013: Research Fellow, Edinburgh University, UK

Edinburgh Cancer Research Centre

My main task was to study transcriptional profiles of breast cancer biopsies to understand and predict response and resistance to aromatase inhibitors (a hormonal treatment) in breast cancer. The specific tasks and responsibilities included:

- Selection of optimal sets of informative genes (based on differential gene expression between responders and non-responders)
- Design and validation of classification algorithms for response prediction (comparing regression models, SVM and decision tree- based algorithms)
- Low level microarray data analysis (mainly R-libraries for Illumina and Affymetrix RNA microarrays)
- Supervision and support for PhD, MSc and MD students within the research group
- Preparation of publications, grant applications and presenting results at international conferences

Along with bioinformatics and wet-lab tasks during that employment I completed MSc in Applied Bioinformatics (Cranefield University, 2012) and PgCert in Academic Practices (Edinburgh University, 2013), reviewed papers for multiple journals and reviewed grants.

2002 – 2007: Research Fellow, NHS Lothian, UK

Breast Research Unit, Edinburgh Western General Hospital

Tasks and responsibilities: Study mechanisms and markers of endocrine resistance in breast cancer, validate micro-array gene expression results with RT-qPCR:

- Development of real-time quantitative PCR methodology for gene expression measurements in clinical samples of breast cancer
- Organizing clinical samples storage and clinical annotations
- Extraction of RNA from tumour biopsies, design and validation of PCR primers, qPCR data analysis

During that employment I performed qPCR analysis in hundreds of samples for multiple genes pre-selected from previous micro-array results. Also, I developed and published a standard curve based method for qPCR data analysis, which has already been cited more than 1000 times (Larionov et al, BMC bioinformatics, 2005).

2001 – 2002: Clinical Research Associate, PSI Pharma Support Inc., St. Petersburg, Russia

Monitoring patients' well-being and regulatory compliance in breast cancer clinical trials.

2000: Postdoctoral Research Fellow, Edinburgh University, UK

The fellowship was awarded by the Royal Society.

Study local estrogen production in breast cancer tissue and in other peripheral tissues. Resulted into two well-cited 1-st author papers.

1992 – 1999: Postgraduate student (specialization in clinical oncology) then PhD student (oncology) then Researcher in N.N.Petrov Institute of Oncology, St. Petersburg, Russia

Education

2011-2013	Postgraduate Certificate in Academic Practices Edinburgh University, UK
2010-2012	MSc in Applied Bioinformatics (bursary awarded by BBSRC) Cranfield University, UK
2001-2002	Postgraduate Certificate in computer sciences State Polytechnical University, St. Petersburg, Russia
1994-1997	PhD in medicine – as recognized by UK NARIC N.N.Petrov Institute of Oncology, St. Petersburg, Russia
1992-1994	Postgraduate specialization in medical oncology N.N.Petrov Institute of Oncology, St. Petersburg, Russia
1984-1992	Bachelor degree in medicine (diploma with distinction) – as recognized by UK NARIC

I.P.Pavlov State Medical University, St. Petersburg, Russia

Selected publications

<u>Articles</u>

These are only papers published within the last 5 years (since 2020) or cited at least 100 times. My overall citation count is 5,016 and the overall h-index is 26, as given by Google Scholar on 17May2025: https://scholar.google.co.uk/citations?hl=en&user=hGLjJ-kAAAAJ
